# ViewIR

Thermal Image Analysis

ViewIR is a sophisticated user-friendly program that satisfies all of your thermal image analysis requirements. With your camera characteristics, scene temperatures and radiance are provided for signature assess-ments. Engineers and image analysts will find ViewIR indispensable for field and lab data reduction and analysis and thermography.

- Sophisticated user-friendly graphical user interface
- Accepts digital imagery from your thermal imager or radiometer
- Supports conversion of counts to temperatures and radiance
- Includes easy-to-use inte-grated image calibration functions
- Supports export of analysis results to MS Excel

- Allows analysis of multiple user-defined areas of interest
- Processes individual and sequences of images easily and efficiently
- Analysis functions:
  - Minimum
  - Maximum
  - Mean
  - Standard Deviation
  - Line plots and many more
